

# Design Review & Guardrails

- Define change window & scope
- Failure modes & rollback
- Evidence artifacts

# Change Plan

- Goals and non-goals
- Pre-checks and success criteria
- Rollback or compensating actions

# Guardrails

- Dry-run first everywhere
- Explicit `--apply` or `COMMIT=true`
- Per-host isolation, timeouts, retries

# Evidence

- Logs with timestamps & request IDs
- Saved diffs and JSON outputs
- Post-checks confirming no-op on repeat
